# APPLYING EXPERT SOLUTIONS TO YOUR PROJECT DESIGN & MANAGEMENT

## ABOUT US

DS Air is a Sydney based HVAC company with over 75 years combined experience. We provide a premium design and installation service for architecturally designed homes and commercial projects.

We pride ourselves on our high quality workmanship, delivering comfortable and economical internal environments for our clients.

Providing the latest technology with a focus on energy efficiency and sustainability without compromising comfort.

We deliver a positive experience from initial consult through project design to final completion and beyond.

## OUR PROJECTS

Are methodically designed by our in house team in collaboration with the broader design team

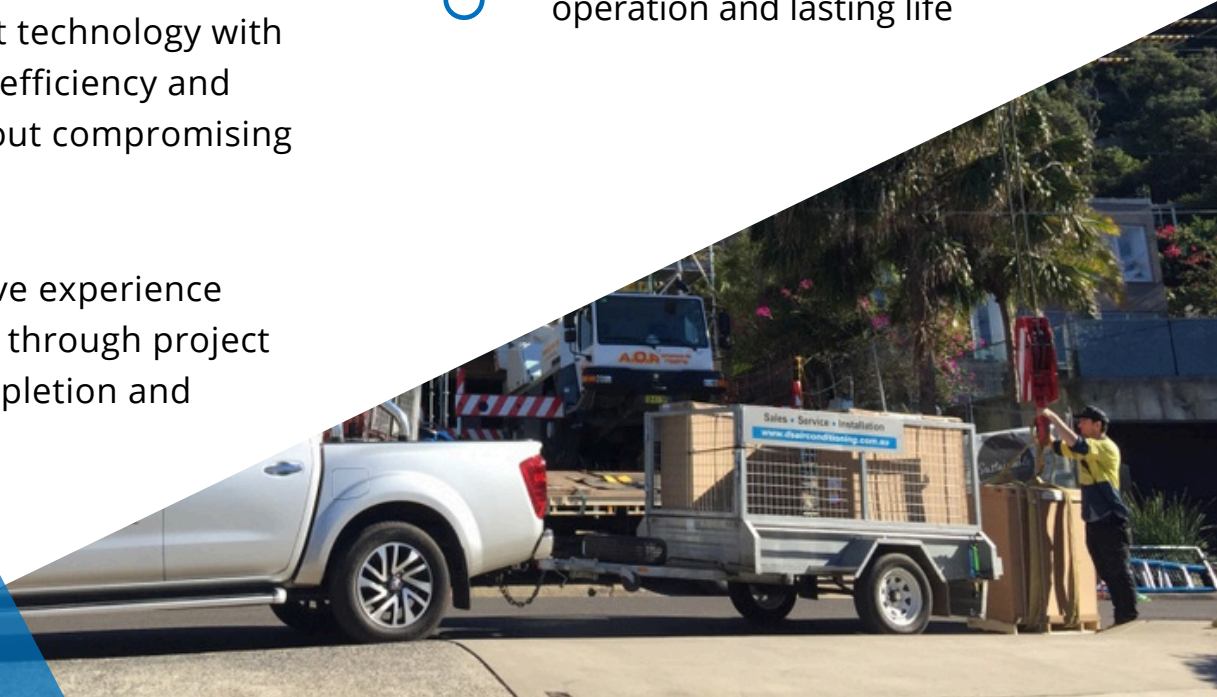

Installed expertly by our technicians, ensuring that the design meets expectations

Energy efficient, reducing their impact on the environment and your pocket

Use the very latest in technology, ensuring excellent operation and lasting life

# BESPOKE RESIDENTIAL

At DS Air we specialise in high end residential projects, delivering a HVAC system that can match the quality of the home.

We are passionate about helping people to achieve their vision for their project by offering an in depth collaborative design and installation approach.

### **INVISIBLE**

We will work with your home designer to ensure that the unit is hidden from view, maintaining your design aesthetic

### **SILENT**

We select our units carefully to ensure that there is no excessive noise in the space, ensuring a comfortable environment

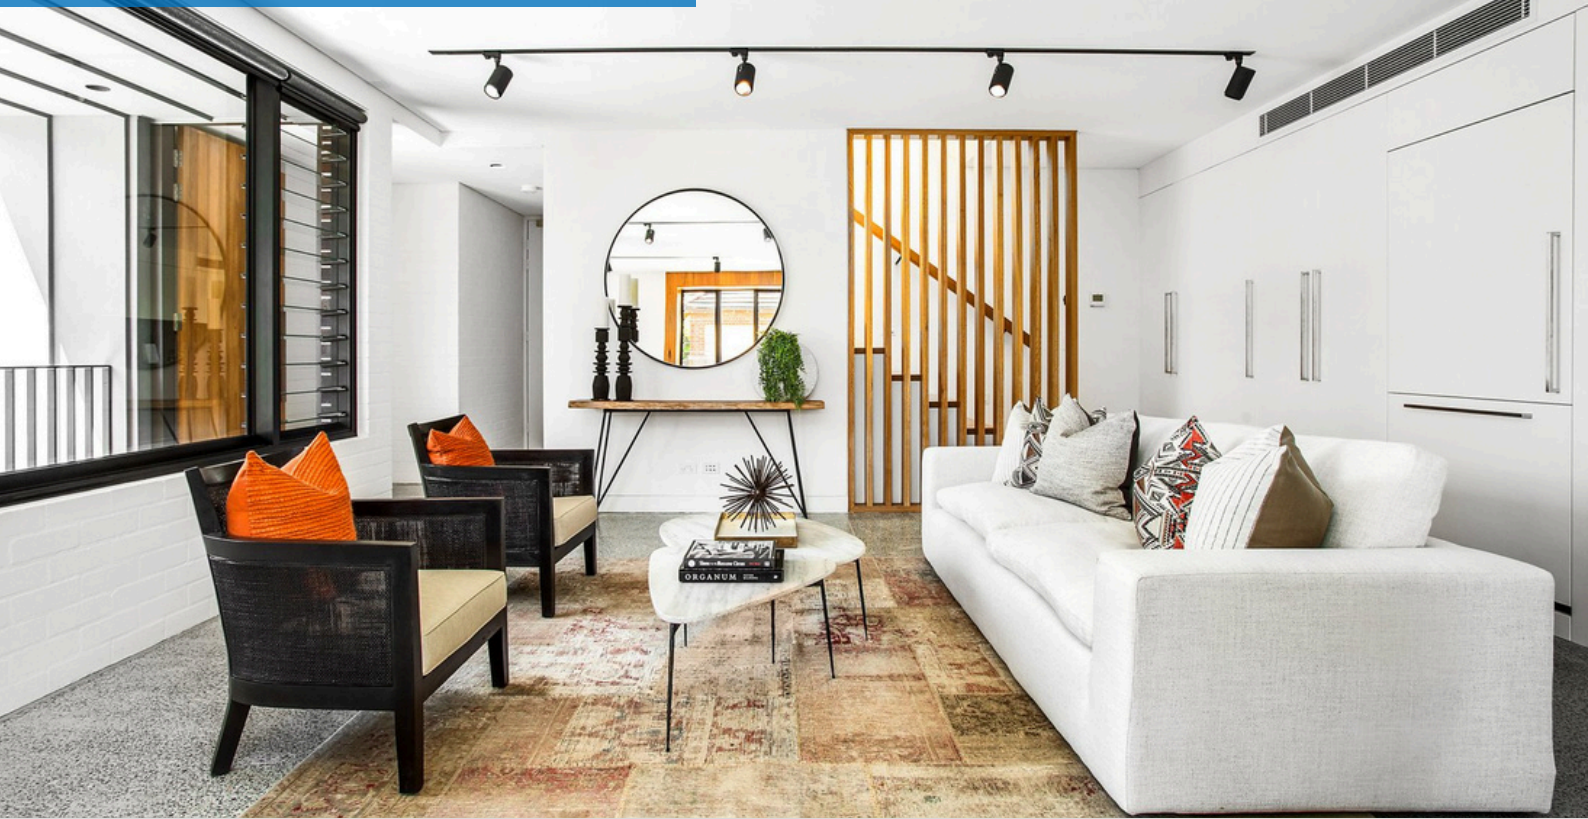

### **PROGRAMMABLE**

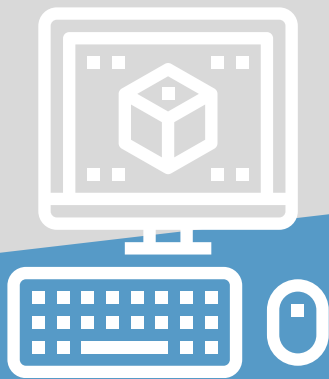

We offer a range of control options depending on your needs, allowing for independent zone control, scheduling and much more

DS Air have a commitment to reducing our installation impact on the environment, Not only does this benefit the planet by reducing emissions but also reducing your running costs in the long term. To that end we only use the latest technologies.

## DESIGN PROCESS

We work closely in collaboration with your broader design team to ensure that your project realises the design intent.

Our approach ensures that the finished product is not only of the highest quality but that the HVAC components both operate and integrate seamlessly into your home.

# COMMERCIAL

We offer comprehensive commercial solutions ranging from high end fitouts in existing buildings to bottom up installations and equipment replacement.

We also provide thorough maintenance solutions to ensure that your installed equipment operates correctly and efficiently over the course of it's lifetime.

Our competitive maintenance packages include reliable support and are completely scalable to fit your project's needs.

## COMMERCIAL FITOUTS

We can apply our commercial experience to deliver expertise in a huge variety of projects, whether straightforward or unique.

Our previous fitout experience ranges from specialized installations, such as dental/medical practices and clean rooms to high end retail facilities and offices.

We can help you to navigate the integration of your fitout within the base buildings footprint.

- Ventilation systems

# SERVICES

- Comprehensive Design
- Installation
- Commissioning
- Existing assets Surveys
- Maintenance Scheduling
- Energy usage optimisation

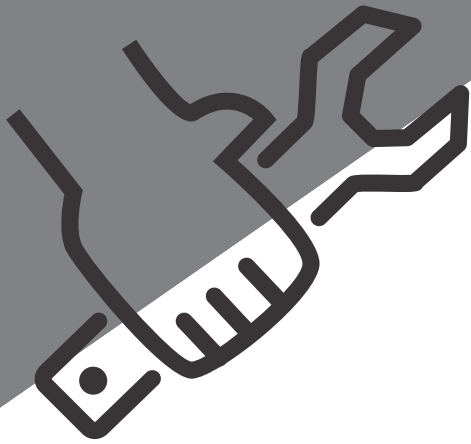

## MAINTENANCE SERVICES

No matter the quality of the installation, not implementing suitable maintenance will result in deterioration of operation and reliability from the outset and potentially lead to critical plant failures in the long run.

Let us help you manage your maintenance in a controlled manner, implementing a schedule that works for you and your tenants.

## COMMISSIONING

We only apply the most stringent commissioning techniques in line with industry best practice, ensuring that your installation is optimally performing from the outset.

This, coupled with our excellent As-installed documentation, means a smooth handover of your facility.

## MAINTENANCE SERVICES

### HEALTH AND SAFETY

At DS Air we do not take shortcuts. The safety of our team and client is always paramount. All of our work is undertaken with strict adherence to industry best practice, as outlined by the relevant standards, Worksafe NSW and the relevant professional bodies.

### THE NEXT GENERATION

At DS Air we hold ourselves to the highest standards and take great pride in the level of work that we produce. We aim to instill this in our new team members via intensive training and mentorship so that they can achieve the same standards.

## MAINTENANCE SERVICES

### STRATA COMPLIANCE

At DS Air we are experts in issues relating to strata compliance. We can advise on required upgrades, potential risks and required maintenance to ensure that the property is meeting its statutory requirements.

### WE HAVE YOU COVERED

We are fully licensed and insured, offering you complete peace of mind.
